

Preliminary Description of Materials & Finishes

Finish selections for all units have been made by the Developer & will be installed as specified.

All information furnished in the specifications is subject to change based on site conditions, construction tolerances or other conditions without notice. In the case of discrepancies between specifications and the field, the field shall govern.

Please note due to the supply chain shortages, longer production and shipping times, the Developer is experiencing challenges with material and fixtures and reserves the right to make replacements of like kind & quality for any item that may be back ordered, out of stock or discontinued.

All finishes have been selected by the Developer and will be installed as specified.

GENERAL

Wood doors are subject to movement because of the natural characteristics of wood. Seller's Responsibility for movement of wood doors shall be governed by the standards of the door manufacturer.

Every building is constantly on the move. On a cold, dry day a building will contract. On a hot, moist day a building actually expands. The reason is that cold and dryness cause some materials to contract, while heat and moisture can cause some materials to expand. A building can swell during rain and shrink during a dry spell. SUCH MOVEMENT CHARACTERIZES ALL BUILDINGS AND IS NORMAL AND SHOULD BE EXPECTED. It is possible that movement will have an effect on the walls, ceilings, floors and framing system of your home. It may cause cracking and nail popping in the drywall. The same problem may occur in the flooring system. THEREFORE, WE ARE UNABLE TO GUARANTEE THAT SETTLING, NAIL POPS, CRACKING OF WALLS AND CERAMIC TILE FLOOR WILL NOT APPEAR.

All samples for selection are of actual materials used at 2345 N. Elston Ct. Because of the natural characteristics, production lots, and other circumstances beyond our control, there may be color shade, hue or texture differences between the sample displayed and the materials supplied or installed in your unit. All construction will conform to and meet the building code requirements of the City of Chicago. Certain changes may be dictated by the City's code. Purchaser's signature appearing in these Specifications shall constitute approval and acceptance of all work, if any, already completed as of this date. Acceptance of keys to the building by Purchaser shall constitute formal acceptance and approval of the completed building. Specifications and brand names herein shall be adhered to as closely as possible. However, substitutions may be made by the seller at its sole discretion. Such substitutions shall be of equal or like kind.
